- The values indicated are approximate and are based on practical experience and ISO 8611-, evenly distributed load over pallet surface, at ambient temperature (23° C) for a specific time. Different load conditions produce different values that have to be checked at the customer's request. Any deterioration or breakage in the pallet may vary these results.
- Due to the characteristics of plastic materials and manufacturing process, the dimensions and the weight of the pallets may present certain tolerances.
- The specification can be affected in case of alteration of the product with parts and / or materials different from those approved by the RePall quality department.
- RePall reserves the right to modify any information herein indicated without prior notice.
- Any warranty, specification or liability on the part of RePall will be terminated in case of modification of the product with spare parts not supplied by RePall.
