Logo (Printed / Engraved)

FEATURES:

- Stackable design allows for safe & space-saving storage
- Lightweight construction for easy handling and reduced shipping weight
- Designed for a single transport or storage cycle to ensure hygiene and safety
- Breathable mesh structure maintains airflow and product freshness
- Reinforced corners support stacking and short-term heavy loads
- Recyclable plastic to minimize environmental impact

- The values indicated are approximate and are based on practical experience and ISO 86111-, evenly distributed load over pallet surface, at ambient temperature (23 C) for a specific time. Different load conditions produce different values that have to be checked at the customer's request. Any deterioration or breakage in the pallet may vary these results.
 - Due to the characteristics of plastic materials and manufacturing process, the dimensions and the weight of the pallets may present certain tolerances.
 - The specification can be affected in case of alteration of the product with parts and / or materials different from those approved by the RePal quality department.
 - RePal reserves the right to modify any information herein indicated without prior notice.
 - Any warranty, specification or liability on the part of RePal will be terminated in case of modification of the product with spare parts not supplied.
