ACCESSORIES ON REQUEST

Logo (Printed / Engraved)

Anti-Slip Rubber

FEATURES:

- Anti-impact perimeter
- Large window operations for easy handling
- Plastic pallets have fewer or no repairs.
- Plastic pallets improve efficiencies due to standard dimensions and lack of broken board.
- Plastic pallets offer better product protection no nails or broken boards to damage payload.
- Plastic pallets offer better stability no damaged or missing boards causing spills or falling stacks.
- Plastic pallets improve safety and lower workers compensation claims.
- Plastic pallets allow for greater utilization of warehouse space stability and higher stacking.

- The values indicated are approximate and are based on practical experience and ISO 8611-, evenly distributed load over pallet surface, at ambient temperature (23 C) for a specific time. Different load conditions produce different values that have to be checked at the customer's request. Any deterioration or breakage in the pallet may vary these results.

- Due to the characteristics of plastic materials and manufacturing process, the dimensions and the weight of the pallets may present certain tolerances.

- The specification can be affected in case of alteration of the product with parts and / or materials different from those approved by the RePal quality department.

- RePal reserves the right to modify any information herein indicated without prior notice.

- Any warranty, specification or liability on the part of RePal will be terminated in case of modification of the product with spare parts not supplied.
